Modular Switches,
Board Mounting Switches,
MCB's, MCB's Db's,
Switchgears, spares and Wires

The Company

We are oldest switch-makers of India since 1935. An era where producing a high grade electrical switch was inconceivable, our founder Late Shri Shanti Swarup Khosla manufactured the superlative tumbler switches and electrical accessories , with the vision to bring light to the homes of India. The vision was further enhanced by his son, Late Shri Krishan Swarup Khosla who brought a major turnaround in the company with his creativity and exceptional organisation skills, he originated high tech modular and luxury switches and myriad of electrical commodities. This legacy of excellence and expansion is further carried forward by our Managing Director Shri Nitin Khosla who emphasises on maintaining a long lasting relationship with the clients through quality perfection. SSK has revolutionised the electrical engineering industry with its unwavering quest for bringing state of the art products and technology to the nation.

28) ROYAL SWITCHES (LUXURY RANGE) 103

Lica
 DX

Easy to Install

Convenient brass terminals screws
anti skid

Unique smooth locking clips

Performance of SSK LICA DX switches tested at our lab :-

- ▲ It withstood 3KV (rms) for 2 minutes.
- ▲ It did not increase 14°C after 50,000 operations in 10AX accessories and 18°C after 50,000 operations in 16 amp accessories.
- ▲ Not exceeded 7mv after 1,20,000 ON-OFF operations in 6 amp and 9mv in 16 amp.
(After this endurance test the products were found in good working conditions).
- ▲ Found more than 500M ohms (after humidity treatment).
- ▲ We tested our switches at 1,20,000 operations on load. (Even after this test, switches worked properly).
- ▲ Tested at a maximum impact energy 1Nm for all rating and designs. (Hammer stoke test from a distance of 270mm).
- ▲ Switches and sockets were tested at 130% of all rated current and 110% of the rated voltage for 1500 operations and were found to be in good working conditions thereafter.
- ▲ There was no sign of any impression on the body (insulation material) of our products, after heating at 125°C for 100 minutes.
- ▲ Was not effected by abnormal heat and fire at 850°C.

*Perfectly designed
for your imagination*

TECHNICAL PERFORMANCE OF SSK MODULAR SWITCHES

TECHNICAL PERFORMANCE OF SSK MODULAR SWITCHES IN COMPARISON WITH THE REQUIRED SPECIFICATION OF ISI CONFORMING TO IS : 3854 : 1997 (ISI MARK)
(TESTS CONDUCTED AT OUR HIGHLY SOPHISTICATED LAB)

Nature of Test	ISI Requirement	Performance of SSK modular switches tested at our lab
Electric Strength	Should withstand 2KV (rms) for one minute	It withstood 3KV (rms) for 2 minutes
Temperature rise	Should not exceed 45°C (at ambient 35°C) after 40,000 ON-OFF operations on load	It did not increase 14°C after 50,000 operations in 6 Amp accessories and 18°C after 50,000 operations in 16 Amp accessories.
Milli Volt Drop	Should not exceed 20mv (in 6 Amp and 16 Amp accessories) after 40,000 operations on load. MEANWHILE NOT SPECIFIED UNDER NEW SPECIFICATION IS : 3854 : 1997.	Not exceeded 7mv after 1,20,000 ON-OFF operations in 6 Amp and 9mv in 16 Amp. (After this endurance test the products were found in good working conditions.
Insulation Resistance	Should not be less than 100M ohms (Before humidity treatment).	Found more than 500M ohms (after humidity treatment).
Electrical Endurance test (ON-OFF test)	Switches should be tested at 40,000 operations (ON-OFF) on load.	We tested our switches at 1,20,000 operations on load. (Even after this test, switches worked properly).
Mechanical Strength	Specified only at 0.4 Nm impact energy. (Hammer stroke test from a distance of 170mm).	Tested at a maximum impact energy 1 Nm for all rating and designs. (Hammer stroke test from a distance of 270 mm).
Making & breaking Capacity	The switches and sockets are required to be tested at 130% of the rated current and 110% of the rated voltage for 500 continuous operations, with an interval of 30 seconds.	Our switches and sockets were tested at 130% of the rated current and 110% of the rated voltage for 1500 operations and were found to be in good working conditions thereafter.
Resistance to heat at 125°C	The outer body of the moulding should be heated to the temperature of 125°C for 60 minutes. Thereafter the ball pressure test should not make an impression deeper than 2mm.	There was no sign of any impression on the body (insulation material) of our products, after heating at 125°C for 100 minutes.
Resistance to abnormal heat & to fire (Glow wire test)	This test is performed on parts of insulating material, which might be exposed to thermal stress due to electric effects and deterioration shall not unduly be affected by abnormal heat and by fire at a temperature of 650°C	Was not effected by abnormal heat and fire at 850°C.

WHY SSK WIRE IS BETTER ?

Heat Temperature Resistant
(Flame Retardant Cables)

High Grade Electrolytic
Copper

High Insulation Resistance

ROHS Compliant Approved

More Than 99% Copper
Conductivity

FEATURES :

- Flame Retardant
- ETP Copper & Maximum Conductivity
- We use High Grade PVC for Better Quality

FR
Wires & Cables
For Better Conductivity

SINGLE CORE, FLAME RETARDANT (FR) UNSHEATHED CABLES WITH FLEXIBLE CONDUCTOR
- VOLTAGE GRADE 1100V, CONFORMING TO IS 694:2010

New Range of Distribution Boards WITH POLYCARBONATE TRIMS

Distribution boards are manufactured out of high quality steel sheets and are processed on CNC machines. Each box goes through the 7 tank process of phosphating before they are powder coated in the best possible environment giving the finest finish.

Products referring to IS : 13032 & IEC : 439 & 529.

Automatic Changeover Switches - DP, AND FP

Single Phase

Three Phase

Single Phase Change Over Switch :

Cat. No.	Rating Amp.	Type	Operating Voltage	M.R.P. / Pc.	Pack Qty.	HSN CODE
<i>New</i> AC-101	32A	DP	220 V AC +/- 10% 50 Hz	4194.00	10	8536
<i>New</i> AC-102	63A	DP	220 V AC +/- 10% 50 Hz	5136.00	08	8536

Three Phase Change Over Switch :

Cat. No.	Rating Amp.	Type	Operating Voltage	M.R.P. / Pc.	Pack Qty.	HSN CODE
<i>New</i> AC-108	63A	FP	220/415 V AC +/- 10% 50 Hz	9123.00	03	8536

Features of Automatic Gen / Main Changeover :

- ▶ Automatically changes the lines from Main to Gen Set & Vice Versa.
- ▶ Changing over the Main line with the relay.
- ▶ Auto Selector.
- ▶ Simplified and Easy Installation.
- ▶ Indication for active power source is available.
- ▶ Avoids physical operations and suffering.
- ▶ All comes as individual Compact Cubical unit.
- ▶ High grade heavy contact points.
- ▶ High quality powder coated CRC Cabinet.

What is Busbar chamber ?

Busbar Chambers are the metallic strips or bars, housed inside the switchgear, panel boards and busway enclosures for high current power distribution and ensure straightforward network configuration. The main purpose of using it to conduct a substantial current of electricity.

Why Busbar protection is required ?

The primary objective of busbar protection is to limit the damage to wires due to loose contacts and also to minimize power losses in distribution.

THE MOST RELIABLE RANGE OF SWITCHGEAR & CHANGE OVER SWITCHES.

- 1) Products conforming to IS : 13947 part 1 & 3 IEC : 60947 part 1 & 2.
- 2) Quick make & break mechanism independent of speed of operating handle.
- 3) Heavy duty spring loaded ETP copper contacts provided for low watt losses & energy saving thus reducing operational cost.
- 4) Flip type spring loaded male contacts / blades provided for splitting and quenching of arc during break operation in high rating change over switches.
- 5) Transparent polycarbonate shroud provided for protection of operator and direct visibility of contacts in high rating changeover switches.
- 6) Additional safety guard has been provided at the incoming side to prevent accident touch with live contacts at the time of maintenance in double break fuse switches.
- 7) State of the Art 8=tank technology employed for anti-rust pretreatment & phosphating.

COVER MOUNTED ADVANTAGE

- 1) TOTAL HUMAN SAFETY ensure while plugging so that "Earth Connection" is made first before the "Phase Connection". Dring disconnecting "Earth Contact" breaks after the "Phase Contact" i.e. EARTH FIRST MAKE, LAST BREAK.
- 2) Socket unit specially COVER MOUNTED to keep it separate during construction activity.
- 3) Artistically deep drawn enclosure avoiding wild joints for better aesthetics and strength.
- 4) Easy and quick fitting / connections ensured by pre-wired unit with adopter.
- 5) Suitable for short circuit & overload protection of Ac's / Geysers etc. When fitted with MCB.

warranty

Warranty Policy :-

- All switches and sockets carry a warranty of 10 years from the date of purchase except L.E.D. indicators, Regulators, AC Starters and Electronic Items.
- L.E.D. Indicators Regulators, AC Starters and Electronic Items carry a warranty of 2 years from the date of purchase.
- The warranty is applicable only against manufacturing defects or faulty workmanship.
- The warranty is however subject to the provision of proper usage and does not cover surface coated products, normal wear and tear of parts, defects arising out of fire, accident, voltage fluctuations and willful or accidental damage.
- The manufacturer will not be liable for any consequential loss, injury or damages attributable to defect or failure of its products.
- The company reserves the right to change/improve the design, without prior notice. In such cases, replacements shall be carried out with the design prevailing at that point in time.

Terms and Conditions :-

- Prices are in Indian Rupees.
- This price list supersedes all previous price lists.
- Prices are subject to change without prior notice.
- Dispute if any are subject to Kapurthala jurisdiction only.

Warranty Policy :-

- All switches and sockets carry a warranty of 10 years from the date of purchase except L.E.D. indicators, Regulators, AC Starters and Electronic Items.
- L.E.D. Indicators Regulators, AC Starters and Electronic Items carry a warranty of 2 years from the date of purchase.
- The warranty does not cover metal wall boxes.
- The warranty is applicable only against manufacturing defects or faulty workmanship.
- The warranty is however subject to the provision of proper usage and does not cover surface coated products, normal wear and tear of parts, defects arising out of fire, accident, voltage fluctuations and willful or accidental damage.
- The manufacturer will not be liable for any consequential loss, injury or damages attributable to defect or failure of its products.
- The company reserves the right to change/improve the design, without prior notice. In such cases, replacements shall be carried out with the design prevailing at that point in time.
